In Towns About

********** From the Daily News.

Saturday night the News announced that President Canterbury's representatives would be in Kansas City today arranging for the \$15,000 required to open the bank, and that Mr. Breidenthal had given them till Thursday morning.

It was also announced that it takes time to raise \$15,000. The latter statement was proven. The Kansas City conference Samurday resulted in asking further time, which Mr. Breidenthal has

It is fair to assume that the efforts being made to raise the money are being pushed and are in a way to succeed, or the bank commissioner would not have conceded the time.

The time limit now set is not known but it is probably the last of the week. Mr. J. D. Wiener is a believer in the theory that the seed is the great factor in the successful growing of wheat. He wanted others to try it, but this year re solved to experiment himself, and on his stock farm in Lincoln township he took forty acres of millet ground and planted it in wheat. Mr. Wiener got his seed from a Harvey county German, white Russian, third year in this country. I was put in with a lister drill.

There was a crowd at the south end of Main street yesterday morning to witness the departure of the "ship." Dick Irons, George Irons, Al Anderson, Ber Yoder, Oscar Barstow and "Dutch" Kern conceived the idea of spending the summer on the water and visiting south. They had a small sailboat built and yesterday morning launched it from a point near the city. Their idea is t float down the Arkansas river and inte the Mississippi, their final destination be ing New Orleans. They will take their time, camping and fishing when the hu mor strikes them.

From the Daily Mail.

Yesterday afternoon the end came to the life of a man who was never for moment commonplace or ordinary. E. J. Tully was, in habits, cosmopolitan ta a superlative degree. He traveled in the east only to become the more devoted to the west. H journeyed in Europe and other foreign lands with the result that his Americanism constantly grew. He was aristocratic and reserved in habits but thoroughly democratic in his sympa thies. His intimate friends were few in number, but those who were close to hin were deeply attached. As a conversa tionalist, Mr. Tully possessed remarkable ability. E. J. Tully was born May 28, 1839, and died at 2:50 o'clock p. m., Sunday, May 9, 1897, at his room in the Arlington hote after a protracted illness. Point, Closing With the Early Gain an Some Besides Lost, as a General Bule Gold Actually Engaged and Rumors of eign Buying-Governments React -London Markets Continue Good.

New York, May 11.-Today's market for stocks continued to be strong and prices advanced all around as long as the London exchange was in session to impart its buoyant influence to the lo cal market. The dealings showed some animation and increase in the volume and the rise in price was easy and uninterrupted. But the spirit of pessimism was too strong to last very long after the adjournment of the London exchange, even with London continuing to buy quite heavily in this market after the close of its exchange. The prices of Americans in London have halted some what up to this time, in spite of the gen eral improvement in that market grow-the general tone in London was so strong and the improvement so general that it extended to the Americans without waiting for New York's initiative. Although gold shipments have been | expected and confidently predicted for this week, the buils lost heart in face of Cash the actual announcement, and the whole Sept currence of decisive strength. As a ma: ter of fact, exchange rates ceased perceptibly with the offerings of against the gold shipment, and the large purchases of securities by London here estimated at 15,000 shares of stock and large blocks of railway bonds. The improvement in the price of Kaffirs in London today is another factor to be con sidered in the exchange situation, as the heavy liquidation of Paris holdings of these securities on the London market is the reputed cause of the Paris demand on London for gold, and, indirectly, of
